Product Description

About:

Jasmine flowers belong to the genus *Jasminum*, which encompasses a wide variety of species. Common species include *Jasminum officinale* (Common Jasmine), *Jasminum sambac* (Arabian Jasmine or Sampaguita), and *Jasminum grandiflorum* (Spanish Jasmine).

Jasmine flowers are known for their small, white, or yellow blossoms, often with a tubular shape. One of the most distinctive features of jasmine is its enchanting fragrance. The scent is sweet, floral, and often described as intoxicating. Jasmine flowers are used to flavor jasmine tea, a popular beverage known for its aromatic qualities. Jasmine flowers are commonly used in weddings and celebrations, symbolizing love, purity, and good luck.
