Product Description

About:

Nelumbo nucifera, is a symbol of purity, enlightenment, and beauty that holds cultural and spiritual significance in various traditions around the world. Nelumbo nucifera is the scientific name for the lotus, commonly known as the sacred lotus or Indian lotus. Lotus flowers are large, showy, and fragrant. They typically have a symmetrical arrangement of numerous petals arranged in multiple layers.

Many lotus flowers are known for their sweet and pleasant fragrance, which intensifies during the blooming period. In some cultures, various parts of the lotus plant are edible. Lotus seeds, found in the seedpod, are commonly used in Asian cuisine. Lotus plants play a crucial role in supporting aquatic ecosystems by providing habitat and food for various organisms.
