Product Description

About:

Mung bean (*Vigna Radiata*) is a plant species of Fabaceae which is also known as green gram. Moong Dal is the Split Version of Whole mung Beans also known as green gram, either with or without skin. The skinned version is known as yellow moong dal, yellow dal or yellow petite lentils. Split version with the skin is known as chilka moong dal, chilka mung or split green mung. These have the green skin intact and only the mung beans are split.

Yellow moong dal consists of small, oval-shaped lentils that are yellow or light green in color. Most of the mung bean cultivars have a yield potential of 1.8-2.5 tons/ha. Mung beans are recognized for their high nutritive value. Although whole mung beans are also occasionally used in Indian cuisine, beans without skins are more commonly used. In Karnataka, Maharashtra, Gujarat, Kerala and Tamil Nadu, whole mung beans are commonly boiled to make a dry preparation often served with congee. Hulled mung beans can also be used in a similar fashion as whole beans for the purpose of making sweet soups.

Specification:

Item	Value
Variety	Pulses

Product Name	Yellow Moong Dal
Storage Type	Dry /Cool Place
Specification	Yellow Vigna Radiata
Product Type	Pulses
Manufacturer	YAI
Ingredients	Fresh Moong Dal
Content	Natural yellow Gram
