Product Description

About:

The Chickpea or Chick Pea (*Cicer Arietinum*) is an Annual legume of the family Fabaceae. There are different types and various known as gram or Bengal Gram or Chana or Garbanzo Bean or Egyptian pea. Chick pea seeds are high in protein. It is one of the earliest cultivated legumes. The chickpea is a key ingredient in Mediterranean and Middle Eastern cuisines, used in hummus.

It is made by splitting and removing the outer husk of chickpeas, resulting in a small, yellow-colored lentil with a nutty flavour and rich aroma. Chana Dal is a staple ingredient in many Indian dishes. Chana Dal requires soaking before cooking to soften its texture. It can be cooked on the stovetop or in a pressure cooker until tender. Chana Dal has a creamy texture when cooked and absorbs flavors well, making it a versatile ingredient in various recipes.
