1. T/T (50 % Advance Rest 50 % Scan copy of BL)

## Product Description

---

### **About:**

Cumin (*Cuminum cyminum*) is an herbaceous plant that belongs to the Apiaceae family. It is an annual plant, which means it completes its life cycle in one year. Cumin plants typically reach a height of about 20 to 30 inches (50 to 75 centimeters) when fully grown. The seeds of the cumin plant are the part that is primarily used as a spice. They are small, elongated, and have a distinctive shape. The seeds have a brown or yellowish-brown color.

Cumin plants have a pleasant and aromatic fragrance, which becomes more pronounced when the seeds are crushed or ground. Cumin seeds are a good source of dietary fiber, iron, and manganese. They also contain various minerals and vitamins in smaller amounts. Cumin seeds should be stored in a cool, dry place in an airtight container to retain their flavor and aroma. Strong and aromatic, especially when toasted or ground.

### **Specification:**

Item	Value
Variety	Single Herbs and Spices
Product Name	Natural Jeera
Storage Type	Dry /Cool Place

<b>Specification</b>	Unique Aroma
<b>Product Type</b>	Whole Jeera
<b>Manufacturer</b>	YAI
