1. Chennai

Payment term :

1. T/T (100% Advance)

Product Description

About:

Betel leaf, scientifically known as Piper betle, is a tropical evergreen plant native to Southeast Asia. It is well-known for its broad, glossy, and heart-shaped leaves, which are often used for their aromatic, medicinal, and cultural significance.

They are often used in various traditional rituals, ceremonies, and social gatherings. Chewing betel leaves is a common practice in these regions. One of the most well-known uses of betel leaves is for betel chewing. People typically wrap areca nuts, slaked lime, and sometimes other flavorings like cardamom or cloves in a betel leaf.

Specification:

Item	Value
Variety	Fresh Tropical Leaf
