Product Description

Grass powder is a dietary supplement obtained from extracting the dehydrated juice of wheatgrass. It is prepared from the grass grown naturally on the field for three or more months before being dehydrated. The primary reason for the numerous health benefits of this powder is its concentrated chlorophyll content (about 70%) in addition to the 98 of 102 earth elements it contains, including calcium, iron, phosphorus, magnesium, and potassium. It also contains essential enzymes.

Benefits

- Grass powder used as a skin cleanser
- It used to treat Acne and skin diseases
- It promotes weight loss
- It also used to treat diabetes
- It is used to treat dandruff and scalp problems
- It also treats Arthritis and prevents cancer
- It also has anti-aging and antiseptic properties
